

Q10) Create an HTTP server using Node.js which handles requests on port 10000 or a free port beyond 10000. Modify the server in such a way that opening localhost:10000 will display “Hello world, This is my Node.js server” on browser.

```
const http = require('http');
const server = http.createServer((req, res) => {
  res.writeHead(200, {'Content-Type': 'text/plain'});
  res.end('Hello world, This is my Node.js server\n');
});
const PORT = 10000;
server.listen(PORT, () => {
  console.log(`Server is running at
http://localhost:${PORT}/`);
});
```
